# impressions expo

Exporting Leads & Connections After the Show

You can export your Team's leads and connections data at any point from a laptop/desktop device.
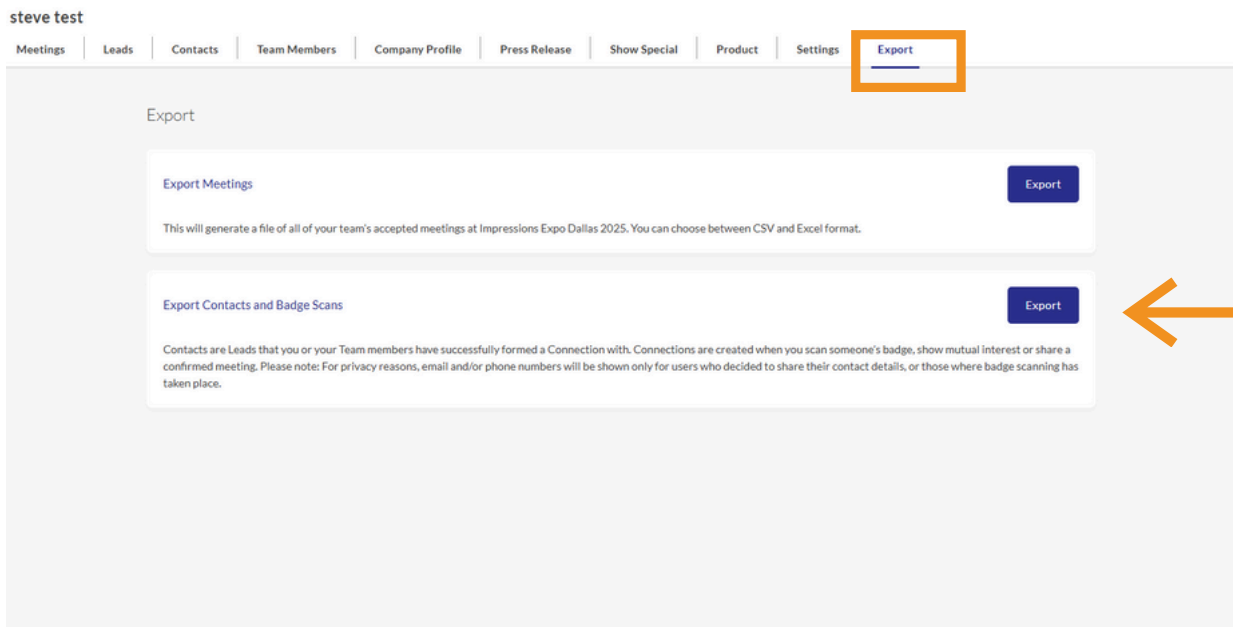

1. Go to http://app.impressionsexpo.com
2. Login using the same username/password for the Mobile App
3. Go to your Team portal via the button in the top right corner

All files export in a CSV or Excel format. It is strongly encouraged to export leads on a desktop/laptop device - not on mobile.

Exporting Leads & Connections After the Show

Once in the Team portal, go to the "Export" tab to the far right and select which data you would like to export.

If a staff member joins a company Team, their leads and connections will automatically transfer over to the Team.

If you have any questions, please reach out to mobileapp@emeraldx.com
